## Research Interests

---

My research interests are in Natural Language Processing and Multi-modal Understanding, with the hope of making machines perceive, understand, and express like humans. Currently, my research focus is committed to adversarial robustness (jailbreaking LLM and mitigation), long video understanding (natural language query localization), and creative multi-modal text generation (humor and association).

## Awards

---

Graduate Student First Class Academic Scholarship, 2023

## Skills

---

**Technical Skills:** Proficient in Python and Pytorch, and has practical experience in finetuning (M)LLMs.

**Characteristic:** Reliable and responsible, with a strong sense of teamwork and a passion for research.
